

What is Claimed is:

- Sub
H/
1. A microencapsulated or enteric coated composition comprising:
(a) a mixture of sorbents with specific adsorption
5 affinities for uremic toxins; and
(b) a bacterial source which metabolizes urea and ammonia.
2. The composition of claim 1 wherein sorbents of the mixture have specific adsorption affinities for ammonia, urea,
10 creatinine, phenols, indoles, and middle molecular weight molecules.
3. The composition of claim 1 further comprising a phosphate binding agent.
4. The composition of claim 3 further comprising a
15 water binding agent.
5. A method of alleviating symptoms of uremia in a patient suffering from uremia comprising administering orally to a patient suffering from uremia a composition of claim 1.
6. A method of alleviating symptoms of uremia in a
20 patient suffering from uremia comprising administering orally to a patient suffering from uremia a mixture of sorbents with specific adsorption affinities for uremic toxins; and a bacterial source which metabolizes urea and ammonia.
7. The method of claim 6 wherein sorbents of the
25 mixture have specific adsorption affinities for ammonia, urea, creatinine, phenols, indoles, and middle molecular weight molecules.
